ACADEMIC EXPERIENCE

Front-end Developer | Electro Emporium

May 2024

I worked as a frontend developer on the "Electro Emporium" academic project, a marketplace for buying and selling electronic products. My responsibilities included creating the product submission form, which allowed sellers to store items in the database and display them in the catalog, integrating cloud technology like Cloudinary for image management. I also facilitated the coordination between sellers and buyers by implementing profile buttons for product delivery. I collaborated in developing an administrative page that provided control over user profiles, orders, and published products.

Throughout the project, I used TypeScript, React, Redux Toolkit, Sequelize, Express, and Bootstrap.

Full-stack Developer | Drivers

Apr 2024

I worked as a full-stack developer on an individual project called "Drivers", where I was responsible for displaying all drivers using data from an API. I created a form to add new drivers, implemented filtering options by name or team, and allowed users to sort drivers alphabetically or by date of birth. Additionally, I developed a detail page for each driver. On the backend, I defined two related database tables (driver and teams) for the creation of new drivers and set up all the server routes. For this project, I used JavaScript, React, Redux, Sequelize, Express, and CSS.

HIGH SCHOOL

- Escuela Normal Manuel Belgrano, Social Sciences and Humanities, 2015-2021

COURSES

- Bootcamp Full-Stack Developer SoyHenry, 2023-2024

SKILLS

- Advanced English
<https://cert.efset.org/eWPPFZ>
- Teamwork
- Problem solving
- JavaScript, TypeScript, HTML, CSS
- React.js, Redux.js, Node.js, Express.js, PostgreSQL, Git, GitHub

OBJECTIVES AND INTERESTS

- Acquire knowledge and experiences
- Perform well in assigned tasks
- Be part of a work team
